

2016 AVERAGE DISTANCE CHART

Per the International Registration Plan (IRP), Massachusetts implemented the Full Reciprocity Plan (FRP) on January 1, 2015. FRP changes the Plan to make it more efficient, equitable and flexible for its member jurisdictions and registrants by granting full reciprocity for all apportioned vehicles in all member IRP jurisdictions and removing from the Plan any provisions related to estimated distance.

In short, upon renewal, all jurisdictions will appear on a vehicle CAB Card and may not be deselected. For additional information on FRP you may visit the IRP website at: www.irponline.org.

When will the 2016 Average Distance be used?

During a **RENEWAL**- If you do not have actual distance for the reporting period, the distance listed will be automatically used. DO NOT manually enter these numbers on your application. The IRP system will auto-populate the fields during the transaction.

SUPPLEMENTAL Applications- When creating a new account or adding a fleet, the Average Distance Chart will be used to calculate registration fees unless you have ACTUAL Miles to report. Please read Section G instructions on the Supplement Application for additional information.
