

2018 AVERAGE DISTANCE CHART

Per the International Registration Plan (IRP), Massachusetts implemented the Full Reciprocity Plan (FRP) on January 1, 2015. FRP changes the Plan to make it more efficient, equitable and flexible for its member jurisdictions and registrants by granting full reciprocity for all apportioned vehicles in all member IRP jurisdictions and removing from the Plan any provisions related to estimated distance. In short, upon renewal, all jurisdictions will appear on a vehicle CAB Card and may not be deselected. For additional information on FRP you may visit the IRP website at: www.irponline.org.

When will the 2018 Average Distance be used?

During a RENEWAL- If you do not have actual distance for the reporting period, the distance listed on this chart will be automatically used. DO NOT manually enter these numbers on your application. The IRP system will auto-populate the fields during the transaction.

NOTE: Use of the Chart will not be permitted for multiple years unless there is a valid documented reason.

SUPPLIMENTAL Applications- When creating a new account or adding a fleet, the Average Distance Chart will be used to calculate registration fees unless you have ACTUAL Miles to report. Please read the Section G instructions on the Supplement Application for additional information.

Following are the Average Distances being used for the 2018 Renewal:

JURISDICTION	AVERAGE DISTANCE	JURISDICTION	AVERAGE DISTANCE	JURISDICTION	AVER DISTANCE
Alberta	225	Manitoba	623	Oklahoma	249
Alabama	183	Maryland	614	Ontario	60
